

SAJID KHAN

SENIOR FRONTEND DEVELOPER • UI/UX DESIGNER

India • Open to remote and hybrid opportunities • sajid.digt@gmail.com • [linkedin.com/in/mohdsajidkhan](https://www.linkedin.com/in/mohdsajidkhan)

15+ years across visual design, UI/UX and frontend engineering. Transforms complex business requirements into responsive, accessible and conversion-focused digital products, with hands-on ownership from structure and interface design through production implementation.

PROFESSIONAL EXPERIENCE

MAGICBRICKS REALTY SERVICES LTD. | India

Senior Frontend Developer & UI/UX Designer • Current role

- Own frontend implementation and UI/UX execution for customer-facing real-estate products, content platforms, campaign microsites and lead-generation journeys.
- Translate product, marketing and sales requirements into responsive interfaces with clear hierarchy, reusable patterns and practical delivery plans.
- Built an SEO-first Research Insights experience with category routes, City/Quarter/Year filters, pagination, dynamic metadata, canonical handling, gated downloads and mobile report viewing.
- Designed and developed conversion-oriented interior-service experiences combining lead capture, project galleries, testimonials, brand proof, process education and FAQs.
- Contribute to editorial and campaign platforms using modular content cards, carousels, media components and responsive content-discovery patterns.
- Improve delivery quality through performance optimisation, accessibility, image optimisation, analytics implementation, cross-browser QA and close stakeholder collaboration.

SELECTED PRODUCT WORK

MagicInteriors — Lead-generation experience. Structured a trust-led consultation journey and reusable responsive modules for benefits, customer stories, project galleries, service steps, partner brands and FAQs.

Magicbricks Research Insights — Report discovery platform. Turned a dense research library into an SEO-friendly, filterable and scalable discovery experience serving users, content operations and lead-generation goals.

Magicbricks Blog — Editorial content platform. Organised a high-volume homepage into clear editorial zones with reusable cards, category modules, expert content, video patterns and responsive discovery paths.

CORE CAPABILITIES

FRONTEND	HTML5, CSS3, JavaScript, React, Next.js, TypeScript, Tailwind CSS, Bootstrap, MUI, responsive architecture
STATE & DATA	Hooks, Context API, Redux Toolkit, Zustand, REST APIs, Axios/Fetch, GraphQL, Apollo/URQL, Contentful
EXPERIENCE DESIGN	UI/UX, wireframes, conversion UX, design systems, Figma, Photoshop, GSAP, ScrollTrigger, Framer Motion
DELIVERY	SEO, GA4, accessibility, Lighthouse, image optimisation, Git, Vite, Webpack, cross-browser QA, stakeholder collaboration

SELECTED IMPACT

- Implemented and quality-checked GA4 instrumentation across static experiences to support reliable measurement and release confidence.
- Created reusable lead-capture and landing-page patterns that improve consistency across campaigns and reduce repeated implementation effort.
- Supported high-volume campaign creative and listing-image delivery while maintaining brand quality across varied business requests.

PROFESSIONAL VALUE

Design-to-code ownership • Product and marketing collaboration • Enterprise content systems • High-volume digital delivery • Clear communication and dependable execution
